Can a Little Free Library have more than one photo?

All Mobile App Features · https://littlefreelibrary.org/docs/can-a-little-free-library-have-more-than-one-photo/

Yes, a Little Free Library can display more than one photo, but the number of visible photos varies depending on how you are viewing our world map. Our world map is available both on our website and through our mobile app. However, many features in the mobile app are not available on the website map.

In the mobile app, up to 10 photos may be displayed per library. To view all available photos of a particular Little Free Library location, start by tapping on the library's pin on the map. Then, tap the **View Library Details** button to view more information about that library. You are now viewing the **Library Detail Screen**. Tap the image to open a screen where you can scroll through all available photos.

On the website map, two photos may be displayed per library. The first two photos the steward added are the ones that will display.

Middleton Conservancy Li...

3228 CONSERVANCY LANE, MIDDLETON, WI 53562
CHARTER # 4515

This library was designed and built by a good friend, who is a custom cabinet maker. He spent over 40 hours on the project.

Originally, it was in our front yard in Cross Plains, Wisconsin but when we moved to Middleton it came with us. We just couldn't leave it behind!...
