How do I favorite or unfavorite a library?

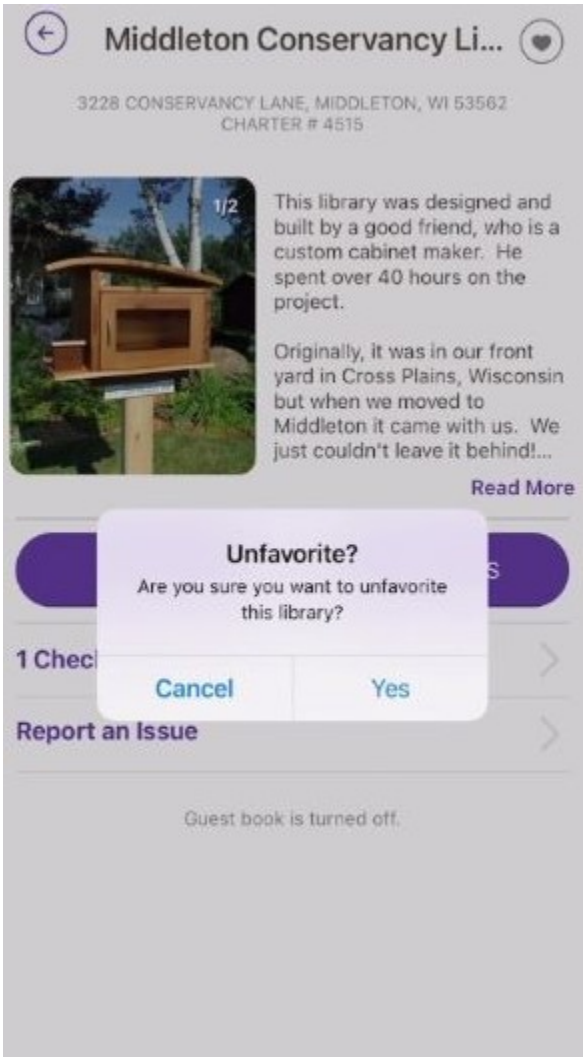

All Mobile App Features · https://littlefreelibrary.org/docs/how-do-i-favorite-or-unfavorite-a-library/

*Note: You must have an account to access the **Favorites** feature in the app. Learn how to set up a free account.*

Start by tapping on the library's pin on the map. Then, tap the **i** in the pop-up to view more information about that library. You are now viewing the **Library Detail Screen**. Click the heart icon in the upper-right to favorite this library. The heart will turn purple to show that it has been added to your **Favorites** list. The library's pin on the map will change to a purple heart, and if you check in to that library, it will then change to an orange heart.

If you want to remove it from your **Favorites**, tap the heart icon again and tap **Yes** to the prompt asking if you want to unfavorite the library.

To view your **Favorites** list, click the heart icon in the main menu in the bottom of your screen. Your **Favorites** list never expires. Any library that you add to your **Favorites** will remain on the list until you unfavorite it.
