My Little Free Library is listed in the app but it doesn’t exist anymore. What do I do?

Stewards & Account Setup · https://littlefreelibrary.org/docs/my-little-free-library-is-listed-in-the-app-but-it-doesnt-exist-anymore-what-do-i-do/

If your Little Free Library has been taken down permanently, you will need to change its **Map Status** to remove it from Little Free Library's app and web map.

In the app, tap the **My Library** section of the main menu. If you steward more than one little library, you will see a list of all of your little libraries on this screen. Tap on the library you would like to edit. Then tap **Edit Library Info**. Scroll down to the **Map Status** field. This is the field that controls whether your library is visible on the app map and web map. If that field is set to **Mapped**, then your library is visible.

You may also change it to any of the following statuses which will remove your library from public view: **Pending**, **Opted Out of Map**, **Taken Down Temporarily**, **Taken Down Permanently**. You can change the **Map Status** of your library at any time. If your library has been taken down permanently, then select the **Taken Down Permanently** status.
