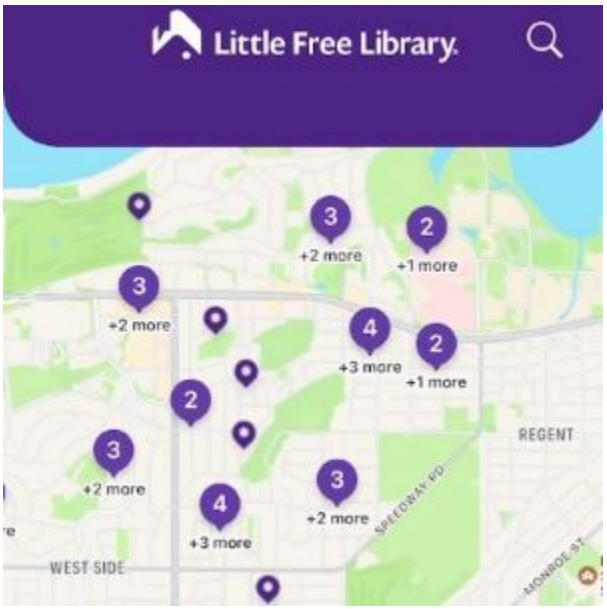
What is the maximum number of libraries I can view on the map?

All Mobile App Features · https://littlefreelibrary.org/docs/what-is-the-maximum-number-of-libraries-i-can-view-on-the-map/

The app can show a maximum of 50 individual Little Free Library pins. When you are zoomed further out, the app will cluster library pins into groups and show you the number of pins in each group. As you zoom in, the clusters will break up into individual library pins.



For example, let's say you search for libraries within 50 miles of your current location, but there are more than 50 results. The app will cluster the pins into groups and display the number of pins in each group. This makes it easy to see areas with a high density of Little Free Libraries. Zoom in on the area that interests you and the clusters will break up into individual library pins.
