I set up my steward account but I don’t see my Little Free Library. How do I find it?

Stewards & Account Setup · https://littlefreelibrary.org/docs/i-set-up-my-steward-account-but-i-dont-see-my-little-free-library-how-do-i-find-it/

Please note that your library must be registered with an official charter sign and number in order to be listed on the Little Free Library web map and mobile app. Learn more about registration.

If you are the primary steward of a registered Little Free Library and have set up your steward account, you can view and edit your libraries in the **My Libraries** section of the mobile app or by logging in to the steward web portal.

If you don't see any libraries listed, the issue could be the email address you used to set up your account. If your Little Free Library is already on our web map (and therefore in our database) with a primary steward email address that is different than the one associated with your account, then our system cannot link your library with your account. Please contact us and we can assist you with connecting your library to your account.
