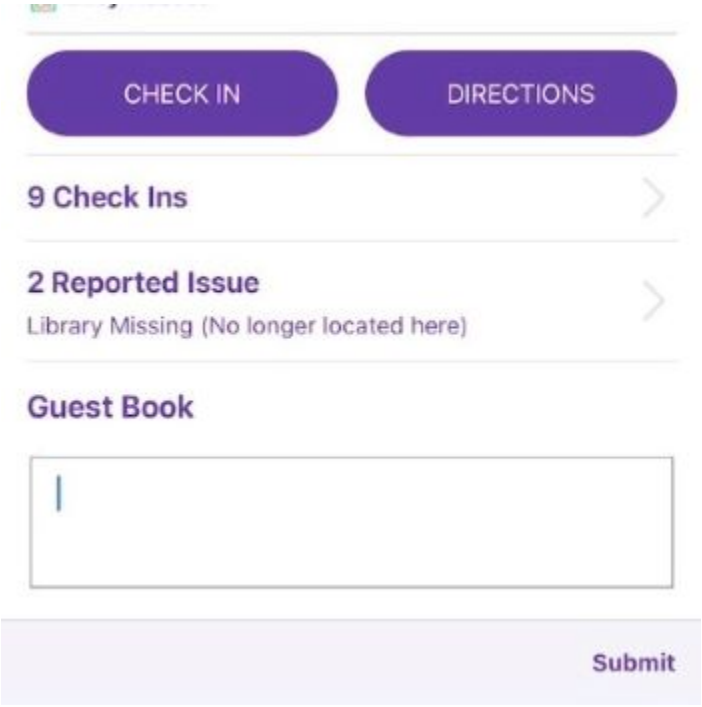
Why is the Guest Book only available for some libraries?

*Note: You must have an account to access the **Guest Book** feature in the app. Learn how to set up a free account.*

The **Guest Book** feature is optional; the library steward chooses to enable or disable it. If the **Guest Book** for a particular library is enabled, you will see a text box on its **Library Detail Screen** where you can add a guest book entry. Images cannot be uploaded with **Guest Book** entries at this time. Beneath that text box, you will also see **Guest Book Entries** from other visitors.



If the steward has disabled the **Guest Book**, then you will see a message that says Guest book is turned off in the **Guest Book** section.
