# Why is the information about my library different on the website map vs. the app?

Stewards & Account Setup · https://littlefreelibrary.org/docs/why-is-the-information-about-my-library-different-on-the-website-map-vs-the-app/

**The Little Free Library mobile app has many more features and than the website map.** The information about your library is synced between the app and the web map, but only a limited amount of information can be displayed on the web map. These fields will appear on the web map:

- Library's GPS coordinates
- Library's address, city, state/province, and postal code (if provided)
- Library's story and tags
- Library's photos

All other fields and features like the guest book, favorites, social media links, announcements, etc. are only available in the mobile app at this time.
