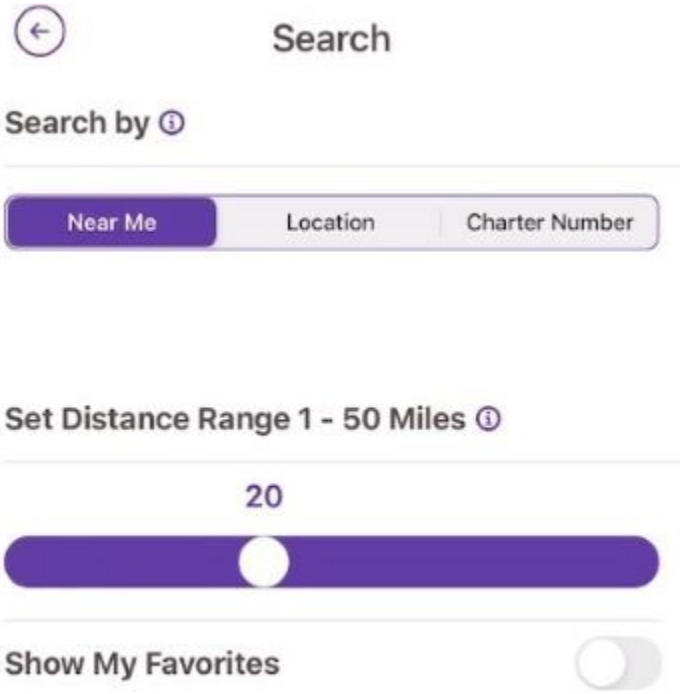
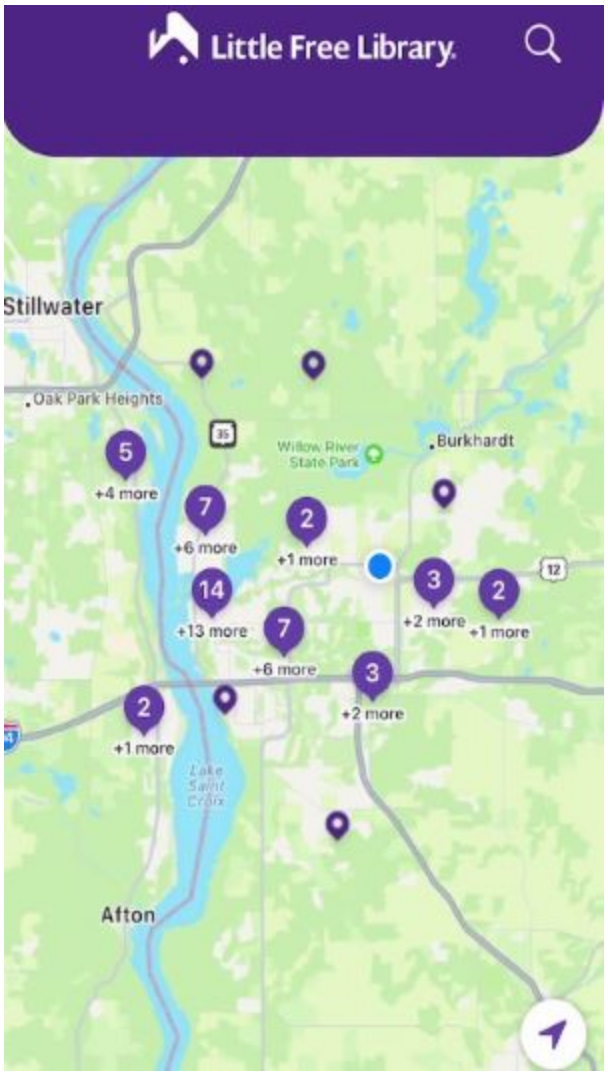
Will more Little Free Library locations appear as I navigate around the map?

All Mobile App Features · https://littlefreelibrary.org/docs/will-new-little-free-library-locations-appear-as-i-navigate-around-the-map/

Yes! Use your fingers to zoom in, zoom out, and navigate around the map. The app automatically finds the center point of your screen and displays library locations based on that center point.



For example, let's say you set your search filters to show libraries within 20 miles of your current location. When you first hit **Search**, the app will center on your current location and show you libraries within 20 miles.



But, as you navigate around the map, the app will adjust to show you libraries within 20 miles of the updated center point of your screen. You can always click the target icon on the bottom-right of the map to re-center to your location.
